The figure consists of two side-by-side line graphs. Both graphs have 'Rate of reaction' on the y-axis and 'Temperature / °C' on the x-axis. The left graph shows a bell-shaped curve that starts at a low rate at 10°C, rises to a peak at 40°C, and then falls as the temperature increases further. The right graph shows a curve that starts at a low rate at 10°C, rises very steeply between 20°C and 30°C, and then levels off, becoming nearly horizontal at 40°C and 50°C.
